Education

Ph.D. in Computer Science

Aug 2018 - Jul 2024

Australian National University, Australia

- Thesis: Visual Analytics of Evolving Graphs
- Research interest: Visual analytics, Human-centered computing, Big data visualization

Master of Science in Computer Science

Mar 2009 - Aug 2011

KAIST, Korea

- Thesis: Achieving Bandwidth Guarantees in Virtual Data Centers using the Hose Model
- Examine network traffic data on on-chip network to introduce a new scalable power-efficient structure

Bachelor of Science in Computer Science

Mar 2004 - Feb 2009

KAIST, Korea

Exchange Programs

Interchange student, Sep 2006 – Feb 2007
Summer session, Jul 2006 – Aug 2006

Fudan University, Shanghai, China
UCSD, San Diego, USA

Work Experience

Post Doctoral Researcher

Jul 2025 - Current

POSTECH, Korea

- Systematically analyze LLMs' network visualization performance and established design guidelines.
- Develop interfaces, benchmark datasets, and evaluation metrics to implement LLM-based systems for visualization quality improvement.

Chief Technical Officer

Dec 2021 - Jan 2025

HSJ & Company, Korea

- Led the technical team to design and implement advanced algorithms to optimize tax planning strategies for users.
- Developed a visual analytics tool that enhanced the understanding of property taxes and supported decision-making in property transfer planning.
- Built an LLM-based chatbot to provide users with clear, accessible explanations of the generated tax planning strategies.

Research Engineer

Sep 2016 - Dec 2021

*ANU College of Engineering and
Computer Science, Australia*

- Developed tools for visualizing knowledge graphs, linking large collections of images with descriptive metadata.
- Created multimedia event summary documents by filtering and clustering extracted media features.

Junior Research Engineer

Aug 2011 - May 2015

Creative Innovation Center

LG Electronics, Korea

- Developed IoT devices to control legacy home appliances and wearables.
- Designed a new UI/UX platform for Real-time OS and customized Android systems.
- Built communication protocols between devices and smartphones via Bluetooth and developed a smartphone app for device control.
- Developed gesture interfaces for edge-banded smartphones on Android, along with device drivers and firmware for touch sensors.

Research Intern

Aug 2010 - Feb 2011

Wireless & Network Group

Microsoft Research Asia, China

- Conducted research on traffic models and topologies for data center networks.
- Developed a new traffic model with enhanced locality awareness to ensure bandwidth guarantees.

Campus Ambassador

Sep 2008 - Feb 2009

Sun Microsystems, Inc., Korea

- Organized and managed the second university Java algorithm contest. Served as a session translator at Sun Tech Day 2008 in Seoul.

Engineering Intern

Mar 2008 - Sep 2008

Web-robot Development Team

Naver Corporation, Korea

- Analyzed page URL patterns and developed web page crawlers to improve data indexing efficiency.
